Special Note:

The purpose of this chart, is Not to identify these four overall frames of reference. Rather, it's purpose is to identify the "logical levels mixup" currently prevailing throughout most of society.

Thus, for example, if there are some religions that do not talk in terms of absolute truth, or that preach that God is more important than people, even though that would contradict the third and second points under "Religious Propaganda", it changes nothing regarding the overall point being made.
